| ABOUT THIS PROGRAMME

AI is rewriting every white-collar role in 2026, and the people who get paid more aren't the ones with the deepest theory — they're the ones who can ship results across 24+ tools by Friday. This one-month programme is hands-on from day one. You'll work inside ChatGPT, Claude, Gemini, Midjourney, DALL-E, Runway, ElevenLabs, GitHub Copilot, Cursor, Zapier, n8n, and 13 more — building real workflows for marketing, content, support, automation, and code. No theory. No filler. You walk out with a 3-piece portfolio and a workflow library you actually use at work.

| QUESTIONS ANSWERED

Common questions, answered upfront

Q. Do I need prior experience to start?

Most students begin with little to no experience. We assume only basic computer literacy. The first two weeks ramp you up to the level the rest of the curriculum needs — no one is left behind.

Q. What if I miss a live session?

Recordings are uploaded within 24 hours of every session. Weekly doubt-clearing sessions catch you up on missed material. Your community is active 24/7. Nothing gets lost, only delayed.

Q. Is there a job placement guarantee?

We don't promise placement — we engineer outcomes. Resume + LinkedIn rewrite, two mock interviews, a referral network, and portfolio reviews are all included. The work happens; the offer is yours to earn.

Q. Can I pay in instalments?

Yes. UPI EMI, credit-card EMI, and a 3-month no-cost split-pay are all supported. Email admissions and we'll set up a plan that fits your cash flow.

Q. Does the certificate hold weight in interviews?

Yes. It's dated, verifiable via our website, and signed by the trainer. Alumni reference it on LinkedIn and inside offer-stage interview rounds — but the portfolio you build matters more, and that's the point.
